

Welcome Families and Students to the 2024-25 School Year!

With the change in guidance from the Center for Disease Control and the Minnesota Department of Health, MTCS has decided to make a change in our practices for responding to COVID-19.

Starting the 2024-25 School Year the following will be in place in response to COVID-19:

- Tracking will no longer occur, so it does not need to be reported to the school should your child test positive for COVID-19.
- When your child tests positive for COVID-19, a 5 day isolation period is no longer required.
- COVID-19 should be treated like any other illness, so please respond to keeping your child home as you would for any other illness / fever.
- Tests are no longer available through the district. Tests can be found at any local pharmacy or doctor.

Here is the most current guidance from the [CDC](#) regarding COVID-19.

If you have any questions or need assistance with finding resources, please contact your child's School Health Office.

Wishing you a healthy start to the school year!
